## **LEADING THE WAY: COMPRESSOR WHEELS FOR INNOVATIVE COOLING**

BOOSTER is an expert in precision components and is now applying this knowledge in areas such as Energy, E-Mobility and Industry. Our company is considered an expert in precision machining and state-of-the-art manufacturing solutions, which as part of our customer service portfolio we are developing together with our customers.

Lately BOOSTER has started supplying compressor wheels for climate-friendly and energy-efficient cooling systems. The special feature is that water is used as the refrigerant. The technology is a closed cycle consisting of compression and other components.

The areas of application are diverse: from the cooling of buildings and server rooms to the cooling of industrial processes in the automotive, pharmaceutical and food sectors.
